

# Run your programmes on Talentral from day one. Pay when your cohort completes.

Talentral is the skills-to-work platform for Northern Nigeria and beyond: one place to recruit applicants, train cohorts, prove skills and connect graduates to work. We are inviting ten founding hubs, with Kirkira Innovation Hub and the iDICE Centre of Excellence as the first.

## What your hub gets

### Your branded academy

Your own space at **yourhub.talentral.ng** with your logo, colours and programme pages.

### Applications and screening

Configurable application forms, scoring, shortlists, and email and SMS updates to every applicant.

### Cohorts and learning

Lessons, live sessions, attendance and announcements. Built for low bandwidth, in English and Hausa.

### Assessment and certificates

Quizzes, rubric-graded projects and certificates anyone can verify by QR code.

### Funder-ready reporting

Live dashboards and exports, disaggregated by gender, age, LGA and state.

### A route to work

With learner consent, graduates join the Talentral talent pool that employers search.

## Founding terms

- **50% off your first cohort** as a founding hub.
- **Pay after completion:** invoiced when your cohort completes, in step with milestone-based funding such as iDICE.
- **Founding-hub pricing** held for your next cohorts for 12 months.
- **You shape the product:** a monthly feedback session with our team.
- **Your data stays yours:** a data-processing agreement under the Nigeria Data Protection Act 2023. Learners own their Passports.

## What we ask

- One named admin contact: we create your hub account and invite them
- Your team completes your hub profile: logo, colours, description and programmes
- Honest feedback and permission to share results as a case study
- A signed data-processing agreement

### October 2026

iDICE Centre of Excellence applications open on Talentral with Kirkira.

### From sign-up

Your account is created and your admin sets up your profile and first call.

### From November

Cohorts, attendance, assessment, then certificates and reporting.
